

SPIN RINSE DRYERS

ClassOne has dedicated refurbishment labs fully equipped for full customer demonstrations. (pictured above)

REFURBISHED SEMITOOOL SPIN RINSE DRYERS

Experts in refurbished Semitool Spin Rinse Dryers.

ClassOne Equipment specializes in the sale of used and refurbished Semitool Spin Rinse Dryers. Our factory-trained technicians provide a complete support cycle, from installation to training to after-sales service. Our singular focus is on giving our customers the quality and reliability they expect at a price they can afford.

We're confident that a ClassOne refurbished spin rinse dryer is simply the best you can buy. Every piece of equipment we sell is refurbished to meet original manufacturing specifications, and we back this superior refurbishment process with an industry-leading 6-month warranty on parts and labor and a 30-day return policy. In addition to our order lead times being less than half those of the OEMs, buying refurbished equipment can save you up to 60% off their prices while providing the same exceptional quality and performance you demand.

WE OFFER THE COMPLETE SOLUTION

Large inventory of equipment, thorough refurbishment process, factory trained technicians to provide installation and training, after sales spare parts and service, industry leading 6 month warranty, 30-day return policy.

SPIN RINSE DRYERS

REFURBISHMENT PROCESS

Our refurbishment process is carried out by our own highly trained technicians to the most exacting standards, as follows:

1 Receiving and Preparation

Spin rinse dryers are cleaned and inspected upon arrival in our warehouse.

2 Refurbishing

All subassemblies are disassembled, cleaned, serviced, tested, reassembled and adjusted as follows:

- ✓ Window replaced with new, as necessary.
- ✓ Start/Stop Switches replaced with new, as necessary.
- ✓ Blanket Heaters replaced with new, as necessary.
- ✓ All supply lines cleaned or replaced as necessary.
- ✓ All seals cleaned, replaced as necessary.
- ✓ Filters replaced with new.
- ✓ Door seal replaced with new, as necessary.
- ✓ Rotor Stop Positioners tested and replaced as necessary.
- ✓ Nitrogen Pressure Sensors replaced as necessary.
- ✓ Bowl inspected, cleaned, and electropolished as necessary.
- ✓ Any worn or damaged parts are repaired or replaced.
- ✓ Machine covers replaced as needed.

3 Quality Control and Shipping

- Spin rinse dryers are fully tested to verify compliance to original specifications.
- System deinstalled and made ready for packing/crating as recommended/required by factory.
- Each professional crate includes a floating base with tip-n-tell and shockwatch devices inside and outside of crate.
- All shipping conducted via approved vendors experienced in global transport of sensitive semiconductor equipment.

Our team of highly-trained professionals are ready to help with the installation and training of your newly refurbished spin rinse dryer equipment.
